

SAFETYHUB OVERVIEW

SafetyHub® is a system of mobile, highly visible and individually contained stations that ensure professional management of health & safety in demanding environments.

SafetyHub® cuts through the confusing and messy communication to ensure every person is aware of the safety measures in place, helping ensure an emergency never even happens. But if it does, they also know where to go and how to deal with it, quickly – whether it be a fire, a workplace injury or a fuel spill – before it gets serious.

Environmental

Fuel and chemical spills can be extremely hazardous to workers and to the environment. Having the right equipment to hand immediately is critical in getting control of an incident and preventing it from developing further.

Fire

Raising the alarm quickly in the event of a fire and having the appropriate equipment on hand to deal with it, remains of utmost importance on every construction site. Be prepared and be proactive!
The SafetyHub® FirePost sets the standard for effective site fire safety.

Health and Wellbeing

Construction sites are hazardous environments and accidents can happen. An effective alert system and the correct response equipment can make the difference between a minor injury and a potential fatality.

Inform

From site entry to exit, it's critical that everyone is aware of the hazards around them; only then can the risks be properly mitigated and accidents prevented.

ENVIRONMENTAL

SHY01

Robustly constructed in rotationally moulded, UV resistant plastic, this mobile solution enables you to place your emergency spill kit just where you need it. The cabinet keeps the spill kit secure, clean and dry.

Suitable for indoor and outdoor locations.

(The required Spill kit needs to be ordered separately)

DIMENSIONS

Height:	1210 mm
Width:	620mm
Depth:	440mm
Internal cabinet dimensions (mm):	700(H) x 545(W) x 260(D)
Empty Weight (approx.):	20kg

FEATURES AND SPECIFICATION

- Space for large spill kit
- Prominent statutory signage
- A4 Snap frame giving space you site specific information
- Lockable cabinet with emergency access panel for key

SHY02

Robustly constructed in rotationally moulded, UV resistant plastic, this mobile solution enables you to place your emergency spill kit just where you need it. The additional red signage panel includes a Fire Action notice and space for a Howler fire alarm. The cabinet keeps the spill kit secure, clean and dry.

Suitable for indoor and outdoor locations.

(The required Spill kit needs to be ordered separately)

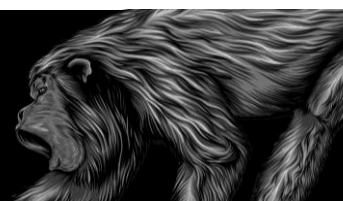

DIMENSIONS

Height:	1555 mm
Width:	620mm
Depth:	440mm
Internal cabinet dimensions (mm):	700(H) x 545(W) x 260(D)
Empty Weight (approx.):	21kg

FEATURES AND SPECIFICATION

- Mounting space for Howler fire alarm
- Fire Action signage
- Space for large spill kit
- Prominent statutory signage
- A4 Snap frame giving space you site specific information
- Lockable cabinet with emergency access panel for key

FIRE

SH02

Robustly constructed in rotationally moulded, UV resistant plastic, this mobile solution enables you to place your fire safety equipment just where you need it.

Designed for indoor locations.

(The fire safety equipment needs to be ordered separately)

DIMENSIONS

Height:	1210 mm
Width:	620mm
Depth:	440mm
Weight:	14kg

FEATURES AND SPECIFICATION

- Mounting space for Howler fire alarm
- Fire Action signage
- Space for two fire extinguishers
- Retaining straps for the extinguishers

SH03 + 4

Robustly constructed in rotationally moulded, UV resistant plastic, this mobile solution enables you to place your fire safety equipment just where you need it. The additional signage panels give scope for more information. There are two options as shown.

Designed for indoor locations.

(The fire safety equipment needs to be ordered separately)

DIMENSIONS

Height:	1210 mm
Width:	620mm
Depth:	440mm
Weight:	14kg

FEATURES AND SPECIFICATION

- Mounting space for Howler fire alarm
- A3 snap frame for site plan
- Fire Marshall notice and Assembly Point notice (SH04 only)
- Fire Action signage
- Space for two fire extinguishers
- Retaining straps for the extinguishers

SHR01

Robustly constructed in rotationally moulded, UV resistant plastic, this mobile solution enables you to place your fire safety equipment just where you need it, and protect it within a secure cabinet. The red signage panel includes a Fire Action notice and space for a Howler fire alarm.

Designed for indoor and outdoor locations.

(The fire safety equipment needs to be ordered separately)

DIMENSIONS

Height:	1555 mm
Width:	620mm
Depth	440mm
Internal cabinet dimensions (mm)	700(H) x 545(W) x 260(D)

Empty Weight (approx.): 21kg

FEATURES AND SPECIFICATION

- Mounting space for Howler fire alarm
- A3 snap frame for site plan
- Fire Action signage
- Space for two fire extinguishers
- Lockable cabinet with emergency access panel for key

SHR02 + 4 + 5

Robustly constructed in rotationally moulded, UV resistant plastic, this mobile solution enables you to place your fire safety equipment just where you need it and protect it within a secure cabinet. The additional signage panels give scope for more information to be displayed. There are three options as shown.

Designed for indoor and outdoor locations.

(The fire safety equipment needs to be ordered separately)

DIMENSIONS

Height:	1555 mm
Width:	620mm
Width (wings open):	1180mm
Depth:	440mm
Internal cabinet dimensions (mm):	700(H) x 545(W) x 260(D)
Empty Weight (approx.):	21kg

FEATURES AND SPECIFICATION

- Foldable wings in red and green wing for fire action notice, fire assembly point information and fire extinguisher details (SHR02)
- Two foldable green wings for first aider information and fire assembly point information (SHR04)
- Foldable wings in yellow and green for spill procedure and first aider information.
- Accommodates 2 x extinguishers (SHR02 & SHR04) or 1 x extinguisher and spill kit (SHR05)
- Red lockable extinguisher cabinet
- Red signage backboard and statutory fire point signage
- Additional green backboard with A3 site plan holder for exit route plan
- Fits any extinguisher type and size
- Compatible with any Howler fire alarm unit

SHR07

Robustly constructed in rotationally moulded, UV resistant plastic, this mobile solution enables you to place your fire safety equipment just where you need it and protect it within a secure cabinet. The additional red signage panel includes a Fire Action notice and space for a Howler fire alarm. One signage panel dedicated to hand sanitiser dispenser.

Designed for indoor and outdoor locations.

(The fire safety equipment needs to be ordered separately)

DIMENSIONS

Height:	1555 mm
Width:	620mm
Depth:	440mm
Internal cabinet dimensions (mm):	700(H) x 545(W) x 260(D)
Weight:	21kg

FEATURES AND SPECIFICATION

- Hand sanitiser and signage on green backboard
- Automatic sanitiser dispenser
- Red lockable extinguisher cabinet
- Red signage backboard and statutory fire point signage
- Fits any extinguisher type and size
- Compatible with any Howler fire alarm unit

SHR08

Robustly constructed in rotationally moulded, UV resistant plastic, this mobile solution enables you to place your fire safety equipment just where you need it and protect it within a secure cabinet. The red signage panel includes a Fire Action notice and space for a Howler fire alarm. Spill kit holder installed on top of the cabinet.

Designed for indoor and outdoor locations.

(The fire safety equipment needs to be ordered separately)

DIMENSIONS

Height:	1555 mm
Width:	620mm
Depth:	440mm
Internal cabinet dimensions (mm):	700(H) x 545(W) x 260(D)
Weight:	22.2kg

FEATURES AND SPECIFICATION

- Red lockable extinguisher cabinet
- Spill canister for the storage of spill kit
- Red signage backboard and statutory signage including fire action notice as shown
- Fits any extinguisher type and size
- Compatible with any Howler fire alarm unit

SHR09

Robustly constructed in rotationally moulded, UV resistant plastic, this mobile solution enables you to place your fire safety equipment just where you need it. The red signage panel includes a Fire Action notice and space for a Howler fire alarm. Includes space for specialist extinguisher for lithium battery fires, and automatic heat or smoke detector on extendipole.

Designed for indoor locations.

(The fire safety equipment needs to be ordered separately)

DIMENSIONS

Height:	1555 mm
Width:	620mm
Depth:	440mm
Internal cabinet dimensions (mm):	700(H) x 545(W) x 260(D)
Weight:	21kg

FEATURES AND SPECIFICATION

- Designed for designated battery charging areas
- Specialist Fire Extinguisher(s) for lithium battery fires
- Includes automatic Heat or Smoke detector as part of ProLink alarm system
- Extendipole Detector suitable for ceilings up to 4m high
- Extendipole mounting system for detector (no ceiling fixings required)

HEALTH AND WELLBEING

SHG01

Robustly constructed in rotationally moulded, UV resistant plastic, this mobile solution enables you to place your first aid kit just where you need it. Includes space for A4 first aid information onsite.

Suitable for indoor and outdoor locations.

(The required first aid kit needs to be ordered separately)

DIMENSIONS

Height:	1210 mm
Width:	620mm
Depth:	440mm
Internal cabinet dimensions (mm):	700(H) x 545(W) x 260(D)
Empty Weight (approx.):	20kg

FEATURES AND SPECIFICATION

- Green secure cabinet for response equipment
- Green backboard with signage
- A4 snap frame for customised notices
- Multi-response kit option that includes first-aid kit, eyewash kit, bleed control kit, burns kit
- Lockable cabinet with emergency access panel for key

SHG02

Robustly constructed in rotationally moulded, UV resistant plastic, this mobile solution enables you to place your first aid kit just where you need it. Includes space for A4 first aid information onsite. Additional signage panel equipped with optional earplug dispenser or similar equipment with relevant signage.

Suitable for indoor and outdoor locations.

(The required first aid kit and earplug dispenser needs to be ordered separately)

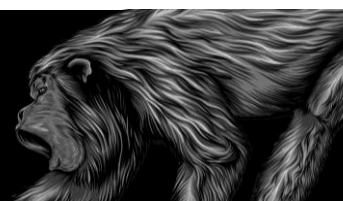

DIMENSIONS

Height:	1555 mm
Width:	620mm
Depth:	440mm
Internal cabinet dimensions (mm):	700(H) x 545(W) x 260(D)
Empty Weight (approx.):	21kg

FEATURES AND SPECIFICATION

- Green secure cabinet for response equipment
- Green backboard with signage
- A4 snap frame for customised notices
- Additional green backboard for an optional earplug dispenser or similar equipment with relevant signage

SHG05

Robustly constructed in rotationally moulded, UV resistant plastic, this mobile solution enables you to place your first aid kit just where you need it. Includes signage panel with automatic hand sanitiser dispenser.

Suitable for indoor and outdoor locations.

(The required first aid kit needs to be ordered separately)

DIMENSIONS

Height:	1210 mm
Width:	620mm
Depth:	440mm
Internal cabinet dimensions (mm):	700(H) x 545(W) x 260(D)
Empty Weight (approx.):	20kg

FEATURES AND SPECIFICATION

- Mobile hand sanitiser stand
- Automatic dispenser
- Green backboard with signage
- Lockable green storage cabinet

SHG06

Robustly constructed in rotationally moulded, UV resistant plastic, this mobile solution enables you to place your first aid kit just where you need it. Includes customisable signage panel available for first aid information onsite. Multi- response kits included as listed below.

Suitable for indoor and outdoor locations.

DIMENSIONS

Height:	1210 mm
Width:	620mm
Depth:	440mm
Internal cabinet dimensions (mm):	700(H) x 545(W) x 260(D)
Empty Weight (approx.):	20kg

FEATURES AND SPECIFICATION

- Green secure cabinet for response equipment
- Green backboard with signage
- A4 snap frame for customised notices
- Multi-response kit option that includes the following:
 - First-aid kit
 - Eyewash kit
 - Bleed control kit
 - Burns kit

SHG07

Robustly constructed in rotationally moulded, UV resistant plastic, this mobile solution enables you to place your first aid kit just where you need it. Includes customisable signage panel available for first aid information onsite. Multi-response kits and defibrillator included.

Suitable for indoor and outdoor locations.

(The required multi-response kit and defibrillator needs to be ordered separately)

DIMENSIONS

Height:	1210 mm
Width:	620mm
Depth:	440mm
Internal cabinet dimensions (mm):	700(H) x 545(W) x 260(D)
Empty Weight (approx.):	20kg

FEATURES AND SPECIFICATION

- Green secure cabinet for response equipment
- Green backboard with signage
- A4 snap frame for customised notices
- Multi-response kit includes the following:
 - First-aid kit
 - Eyewash kit
 - Bleed control kit
 - Burns kit
 - Heartsine Defibrillator

Inform

SHB01

Robustly constructed in rotationally moulded, UV resistant plastic, this mobile solution enables you inform people from the very entry to your site. Includes 4 x customisable A4 panels and 1 x A3 panel.

Suitable for indoor and outdoor locations.

DIMENSIONS

Height:	1555 mm
Width:	620mm
Width (wings open):	1180mm
Depth:	440mm
Internal cabinet dimensions (mm)	700(H) x 545(W) x 260(D)
Empty Weight (approx.):	24kg

FEATURES AND SPECIFICATION

- Space for mandatory PPE
- A3 Site plan holder
- 4 no. A4 snap frames for signage
- Automatic hand sanitiser dispenser and notice
- Lockable cupboard for spare PPE and/or safety equipment
- Extremely robust and stable

SHB02

Robustly constructed in rotationally moulded, UV resistant plastic, this mobile DABs (Daily Activity Board) solution enables you inform people at point of entry to your site. A large A2 magnetic dry wipe board and handy set of magnetic hazard notices enables you to quickly update the daily hazards. Includes 2 x A4 snap frame holder for customised notices, and standard signs for fire and first-aid requirements.

Suitable for indoor and outdoor locations.

DIMENSIONS

Height:	1555 mm
Width:	620mm
Width (wings open):	1180mm
Depth:	440mm
Internal cabinet dimensions (mm)	700(H) x 545(W) x 260(D)
Empty Weight (approx.):	24kg

FEATURES AND SPECIFICATION

- A2 magnetic dry-wipe board for quick and easy updates
- Includes set of magnetic hazard & control signs
- Secure lockable equipment cabinet for zone-specific PPE and emergency response kits
- 2 x A4 snap frame holder for customised notices
