

HELLO TO HOWLER

DRIVING FIRE SAFETY EXCELLENCE
ON CONSTRUCTION PROJECTS

[HOWLERUK.COM](https://www.howleruk.com)

Hello and Welcome to Howler!

Like you, we are a team of real people, and we aim to make your life easier through the delivery of safe, simple and sustainable fire safety solutions. Navigating your way through the maze of fire safety compliance requirements has never been more challenging, so our proven processes lead you along this path with confidence and without wasting time.

For over 40 years we've been protecting lives and livelihoods from the impact of fire. Our specialism in temporary fire safety started when we created the world's first battery operated site alarm, specifically for construction sites. Named after the world's loudest creature, the howler monkey, we continue to make a big noise about fire safety.

We look forward to joining you on your journey, giving you the peace of mind that fire safety on your projects is in safe hands.

DESIGN, SUPPLY, MAINTAIN

Howler is more than a supplier. We are your fire safety partner.

We take care of everything on site, so your team doesn't have to. Howler works alongside contractors as a dedicated fire safety subcontractor - taking responsibility for the design, installation and ongoing maintenance of temporary fire safety systems. From pre-construction through to project completion, we ensure your site remains protected, compliant and fully supported.

DESIGN

Our technical team reviews drawings and programmes to design a compliant fire safety system.

- Marked-up drawings tailored to your site
- Designed in line with JCOP, HSG168, BS 5839-1
- Consideration of site phasing and evolving risks

SUPPLY

We provide industry-leading equipment, purpose-built for construction environments.

- ProLink® wireless fire alarm systems
- SafetyHub® fire safety points
- Fire extinguishers and supporting equipment

MAINTAIN

We take care of everything on site so you don't have to.

- Installation and commissioning
- Ongoing maintenance and adjustments
- Support as the site evolves
- End-of-project removal

WHAT THIS MEANS FOR YOU

Pre-Construction and Estimating

- Accurate fire safety planning and cost certainty
- Alignment with insurer requirements (JCOP/HSG168)
- Smooth handover to delivery teams

Operations

- A fully managed system - no need to coordinate multiple suppliers
- Reliable alarm coverage across the site
- A partner who understands live construction environments

Commercial

- Covering design, equipment and support
- Cost-effective hire model (ProHire®)
- Reduced risk of non-compliance, variation or rework

WHY THIS APPROACH MATTERS

Fire alarm systems are life safety systems, not just another site utility. There is an increasing demand to be able to provide evidence of competency matters relating to fire safety, which is why a specialist with the relevant third party accreditation is important.

Working with a dedicated fire safety partner helps ensure:

- ✓ Systems are designed specifically for fire safety compliance
- ✓ Alarm coverage is correct for your site layout and phasing
- ✓ Equipment is fit for purpose in construction environments
- ✓ Responsibility is clearly defined and managed
- ✓ Your team is fully supported throughout the project

**You deliver the project.
We take care of fire safety.**

"It's easy to work with Howler. Our focus is on compliance and best practice on site, and Howler have helped us achieve this in terms of fire safety. We engage with them early on in projects and they give recommendations and input at this stage so we hit the ground running when we win the scheme."

Knight Harwood

"Howler put time into understanding the project and the proposed build method before recommending appropriate levels of fire cover. They then offered cost reduction options and made the trade-offs clear. The priority, though, was compliance, and I felt confident that we wouldn't stray from this when looking at different product options."

Multiplex

"As a company operating in the super-prime residential sector, client site visits are crucial for us. The Howler kit not only looks impressive but also exemplifies our commitment to maintaining ultra-high standards. Additionally, we trust Howler to recommend compliance solutions that meet our needs without going over the top."
